English Translation

From the "Chemical Factory" edition on 11. May, I am copying the following advertisement:

"Lecture Series on Process Engineering" at the Karlsruhe Technical University. During his trip to Germany, Prof. W.L. Badger, Professor of Chemical Engineering at the University of Michigan, Ann Arbor, Michigan, will give the following lectures in the week after Pentecost, to which every chemist and engineer has free admission:

- 7. June: "Theory and Construction of Vaporization Apparatuses"
- 8. June: "The Current State of Research on Heat Transfer in the United States"
- 9. June: "The Training of Chemical Engineers in America "
- 9. June: "The History of the Chemical Apparatus"

As I already mentioned, the event will be organized by my colleagues, Plank and Kirschbaum, who can certainly tell you when Mr. Badger will arrive here.
